

I have prepared this file and I hope it will help.

Cockpitsonic AFDS panel

The AFDS panel is connected to the same wires for both Captain and F/O sides so they operate together giving the same readings.

Captain and F/O sides

1. A/P RST LED = WS/GE - BN +
2. A/T RST LED = WS/GE - SW +
3. FMC RST LED = WS/OR - SW +
4. A/P RST Push Button = WS/BN - SW +
5. A/T RST Push Button = WS/GE - SW +
6. FMC RST Push Button = WS/RT - SW +

The colours we use are :-

SW = Black
BN = Brown
RT = Red
OR = Orange
GE = Yellow
GN = Green
BL = Blue
GR = Grey
WS = White

Sorry I can't help with the card you are connecting to as each brand varies.
